INDEX TO VOLUME XXX

The asterisk * preceding the page number indicates an original article in the Journal. The letter T preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter D preceding the page number indicates a discussion of an original article or some other item published in the Journal. The letter B preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

Accumulation of smooth cisterns, multivesicular bodies and "Zebra" bodies in neurons. a case of peculiar storage condition, T148
Adachi, M., J. Torii, L. Schneck, and B. W. Volk, electron microscopic and enzyme histochemical studies of the cerebellum in spongy degeneration (Van Bogaert and Bertrand Type), T149
—, see Torii, J., *278
—, see Volk, B. W., T147
Aging, regional energy metabolism and lipofuscin accumulation in mouse brain during, *638
Akai, K., see Roizin, L., T142
Alksne, J. F., arachnoid villi after subarachnoid blood, T135
Application of a new type of pattern recognition system to neuropathological material, the, T132
Arachnoid villi after subarachnoid blood, T135
Austin, J., see Nikaido, T., T146
—, see Stumpf, D., T147
Axon, central myelinated, pathological findings, *325
Ayala, G. F., see Okada, K., T120
—, see Okada, K., *337

Baker, L., see Gambetti, P., *412
Baker, R. N., P. A. Cancilla, P. S. Pollock, and S. P. Frommes, the movement of exogeneous protein in experimental cerebral edema, an electron microscopic study after freeze-injury, *668
—, P. A. Cancilla, P. S. Pollock, and S. P. Frommes, movement of exogenous protein in cerebral edema, T138
Banker, B. Q., and J. P. Girvin, the ultrastructural features of the mammalian muscle spindle, *155
—, the ultrastructural features of the normal and de-efferented muscle spindle, T136
Barden, H.: The histochemical distribution and localization of copper, iron, neuromelanin and lysosomal enzyme activity in the brain of aging Rhesus monkey and the dog, *650
Barron, K. D., see Koeppen, A. H., T135
—, see Koeppen, A. H. W., *448
Behavior of oligodendroglia during demyelination in vitro, the, T128
Bignami, A., and H. B. Parry, vacuolation of neurons in natural scrapie. electron microscopic observations, T123
Bigner, D. D., N. A. Vick, J. P. Kvedar, and W. King Engel, correlated virological and ultrastructural study of Schmidt-Ruppin Rous sarcoma virus-induced dog brain tumors, T122
—, see Brightman, M. W., T139
—, see Vick, N. A., *354
Bjorklund, A., see Katzman, R., T135
Bondareff, W., see McLone, D. G., *627
Bornstein, M. B., and H. Iwanami, experimental allergic encephalomyelitis: demyelinating activity of serum and sensitized lymph node cells on cultured nerve tissues, *240
—, see Raine, S., T128
Brain edema in the hydrocephalic hy-3 mouse: submicroscopic morphology, *627
Brand, M. M., H. S. Maker, G. M. Lehrer, and H. M. Shein, metabolic characteristics of experimental gliomas derived from cloned neoplastic cells, T121
Brightman, M. W., T. S. Reese, N. A. Vick, and D. D. Bigner, a mechanism underlying the lack of a blood-brain-barrier to peroxidase in virally induced brain tumors, T139
—, see Reese, T. S., T137
Brown, B. D., see Brunngraber, E. G., *525
Brunngraber, E. G., B. D. Brown, and I. Chang, glycoproteins in subacute sclerosing leukoencephalitis: isolation and carbohydrate composition of glycopeptides from human brain, *525
—, see Haberland, C., *431
Budzilovich, G., see Feigin, I., *216
—, see Ogata, J., *206
Bunge, R. P., see Masurovsky, E. B., *311

Cadmium-incidence injury in the rat spinal ganglia, T141
Cammermeyer, J., myelencephalic bodies of the guinea pig: a light microscopic study of hitherto undescribed juxtavascular

structures in the medulla oblongata, T134
Cancilla, P. A., see Baker, R. N., *668
—, see Baker, R. N., T138
Carpenter, S., G. Karpati, and L. Wolfe virus like filaments and phospholipid accumulations in a case of chronic myopathy, T136
—, see Karpati, G., T137
Cerebellar glomeruli, in cerebellar malformation induced by feline panleukopenia virus, *196, *557
— malformation, synaptic organization induced by feline panleukopenia virus (PLV), *196
Cerebral edema, experimental, movement of exogenous protein in, *668
Chang, I., see Brunngraber, E. G., *525
Chediak-Higashi disease, mink cytoplasmic inclusions in, *470
—, neuropathological changes in mink, *33
Chick embryos, neural tube defects in, an indirect result of influenza A virus, *68
Chimpanzees, experimental spongiform encephalopathy (Creutzfeldt-Jacob disease) in, *20
Cholesterinosis of the basal ganglia associated with olivocerebellar atrophy in an adult, *390
Chou, S. M., and A. V. Fakadej, ultrastructure of chromatolytic motoneurons and anterior spinal roots in a case of Werdnig-Hoffmann disease, *368
Clarke, J. T. R., see Karpati, G., T137
Cole, G. A., see Gilden, D. H., T130
Cole, M., R. B. Rutherford, and F. O. Smith, experimental ammonia encephalopathy in the primate, T125
Constantopoulos, G., and A. S. Dekaban, content and distribution of molecular weights of mucopolysaccharides in the brain and other organs of Hurler's patients, T144
Content and distribution of molecular weights of mucopolysaccharides in the brain and other organs of Hurler's patients, T144
Cook, S. D., see Hirano, A., T128
—, see Hirano, A., *249
—, see Whitaker, J. N., T129
Copper, histochemical distribution and localization in brain of aging Rhesus monkey and dog, *650
Correlated virological and ultrastructural study of Schmidt-Ruppin Rous sarcoma virus-induced dog brain tumors, T122
Crain, S. M., see Bornstein, M. B., T129
Cravioto, H., H. H. Goebel, J. Weiss, and J. Ransohoff, experimental induction of nervous system tumors by alkylating agents. preliminary observations, T121
Creutzfeldt-Jacob disease, in Chimpanzees, *20
Cyclophosphamide-induced protection against acute lymphocytic choriomeningitis in mice, T130
Cytoplasmic inclusions in Chediak-Higashi mink. an electron microscopic study of the nervous system, *470

De Estable-Puig, F., and J. F. Estable-Puig, synaptopathology of irradiated nervous tissue, T126
Defendini, R. see Duffy, P. E., *698
Dekaban, A. S., see Constantopoulos, G., T144
Demyelination, activity of serum and sensitized lymph node cells on cultured nerve tissues in experimental allergic encephalomyelitis, *240
—, fine structure of in vitro Guillain-Barré serum induced, *249
— and remyelination in diphtheria induced C. N. S. lesions, T131
DiMauro, S., see Gambetti, P., *412
Dodson, R. F., s-collidine as a buffering system for glutaraldehyde perfusion of the central nervous system, *714
Dominant olivopontocerebellar atrophy with dementia and extrapyramidal signs: report of a family through three generations, T133
— spino-pontine atrophy: report of a family through three generations, T131
Dowling, P. C., see Hirano, A., T128
—, see Hirano, A., *249
—, see Whitaker, J. N., T129
Duffy, P. E., R. Defendini, and L. T. Kremzner: regulation of meningioma cell growth *in vitro* by polyamines, *698

Early evolution of intracytoplasmic inclusion bodies of Tay-Sachs Disease, T147
Eckroade, R., see Zu Rhein, G. M., T124
Edema, brain, effects of glucosteroids upon cold induced, *680
—, in gray matter of human brain, *206
—, role in pathogenesis of syringomyelia, *216
— of the gray matter of the human brain, *206
— — the pH on the in vitro development of Spielmeyer's ischemic neuronal changes, *99
Effect of undernutrition on myelination of rat sciatic nerve, the, T130
Effects of glucosteroids upon cold induced brain edema. II. ultrastructural evaluation, *680
Electron microscopic and biochemical studies of late-onset Pompe's disease (Cori type II b glycogenesis): proposal for pathogenesis, potential for therapy, T143
— — and enzyme histochemical studies of the cerebellum in spongy degeneration (Van Bogaert and Bertrand Type), T149
— — observations of neurovisceral thesaurismosis in an adult (Kufs type of amau-

rotic family idiocy with visceral involvement), T144
— — studies of aging in drosophila brain, T148
— — study of the blood-brain and blood-cerebrospinal fluid barriers with microperoxidase, T137
Embree, L. J., see Shein, H. M., T138
Encephalitis, experimental California virus, in mouse, *91
—, vesicular stomatitis virus in mice, *266
Endoneurial deposits of amyloid-like fibrils in a recurrent primary demyelinating neuropathy. an electron microscope study, *583
Engel, W. King, see Bigner, D. D., T122
Epileptogenic lesion, ultrastructure of penicillin induced, *337
Estable-Puig, J. F., see de Estable-Puig, F., T126
Evidence for abortive regeneration of adrenergic fibers in rat mesencephalon, T135
Experimental allergic encephalomyelitis: demyelinating activity of serum and sensitized lymph node cells on cultured nerve tissues, *240
— ammonia encephalopathy in the primate, T125
— hydrocephalus in young dogs: histological and ultrastructural study of the brain tissue damage, *613
— induction of nervous system tumors by alkylating agents. preliminary observations, T121
— spongiform encephalopathy (Creutzfeldt-Jakob Disease) in chimpanzees, electron microscopic studies, *20
— transmissible mink encephalopathy (TME) in mink, monkey, and hamster. electron microscopic studies, T124
— vincristine myopathy—a histochemical, ultrastructural and biochemical study, T137
— Wallerian degeneration in peripheral nerves of dogs with globoid cell leukodystrophy, *593

Fakadej, A. V., see Chou, S. M., *368
Feder, N., see Reese, T. S., T137
Feigin, I., and J. Ogata, Schwann cells and peripheral myelin within human central nervous tissues: the mesenchymal character of Schwann cells, *603
—, J. Ogata, and G. Budzilovich, syringomyelia: the role of edema in its pathogenesis, *216
—, see Ogata, J., *206
Feldman, L. A., see Tellez-Nagel, I., T124
Ferrendelli, J. A., W. G. Sedgwick, and V. Suntzeff, regional energy metabolism and lipofuscin accumulation in mouse brain during aging, *638
Fibrils, amyloid-like, in recurrent primary demyelinating neuropathy, *583
Fine structural aspects of demyelination in vitro, T128
— structure of canine gliomas and intracranial sarcomas induced by the Schmidt-Ruppin strain of the Rous sarcoma virus, the, *354
Fisher, C. M., pathological observations in hypertensive cerebral hemorrhage, *536
Fletcher, T. F., H. J. Kurtz, and E. M. Stadlan, experimental Wallerian degeneration in peripheral nerves of dogs with globoid cell leukodystrophy, *593
French, L. A. see Long, D. M., *680
Frommes, S. P., see Baker, R. N., *668
—, see, T138
Fucillo, D., see Watanabe, I., T123

Gajdusek, D. C., see Lampert, P. W., *20
Galactosamine myelopathy, T142
Galactosemia, histological and biochemical study, *431
Gambetti, P., accumulation of smooth cisterns, multivesicular bodies and "Zebra" bodies in neurons. a case of peculiar storage condition, T148
—, S. DiMauro, and L. Baker, nervous system in Pompe's disease. ultrastructure and biochemistry, *412
Garro, F., see Lampert, P., T142
Giant-celled glioblastoma, *290
Gibbs, C. J., see Lampert, P. W., *20
Gilden, D. H., G. A. Cole, and N. Nathanson, cyclophosphamide-induced protection against acute lymphocytic choriomeningitis in mice, T130
Gilles, F. H., and R. A. Price, late gestational changes in the human ganglionic eminence, T134
Girvin, J. P., see Banker, B. Q., T136
—, see Banker, B. Q., *155
Glial filaments in the myelin sheath after vinblastine implantation, *63
Gliomas, canine, induced by Schmidt-Ruppin strain of Rous sarcoma virus, *354
Globus, Grete, in memoriam, *1
Glucosteroids, effects upon cold induced brain edema, *680
Glutamate-induced neuronalnecrosis in the infant mouse hypothalamus: an electron microscopic study, *75
Glutaraldehyde, s-collidine as buffering system for central nervous system perfusion with, *714
Glycoproteins in subacute sclerosing leukoencephalitis: isolation and carbohydrate composition of glycopeptides from human brain, *525
Goebel, H. H., see Cravioto, H., T121
Graham, D. G., and J. B. Sidbury, Jr., electron microscopic and biochemical studies of late-onset Pompe's disease (Cori type II b glycogenesis): proposal for pathogenesis, potential for therapy, T143
—, see Parker, Jr., Joseph C., T125
Gray matter, edema in human brain, *206
Guillain-Barré, fine structure of, in vitro serum induced demyelination, *249

XUM

Haberland, C., M. Perou, E. G. Brunngraber, and H. Hof, the neuropathology of galactosemia. a histological and biochemical study, *431
Hanaway, J., and M. G. Netsky, heterotopias of the inferior olive: relation to Dandy-Walker malformation and correlation with experimental data, *380
Hanson, R. P., see Zu Rhein, G. M., †124
Harter, D. H., see Miyoshi, K., *266
